INTRODUCTION

The wall shelf system is made of strong aluminium profiles with connectors for wooden or glass shelves. It is easy to install, secure with screws, and offers different styles and functions to fit your needs.

There are three installation methods available:

Option A: Back Surface Cutting with Metal Wall Bracket

Option B: Direct Fixing to the Wall (without Bracket)

Option C: Side Surface Cutting with Metal Wall Bracket

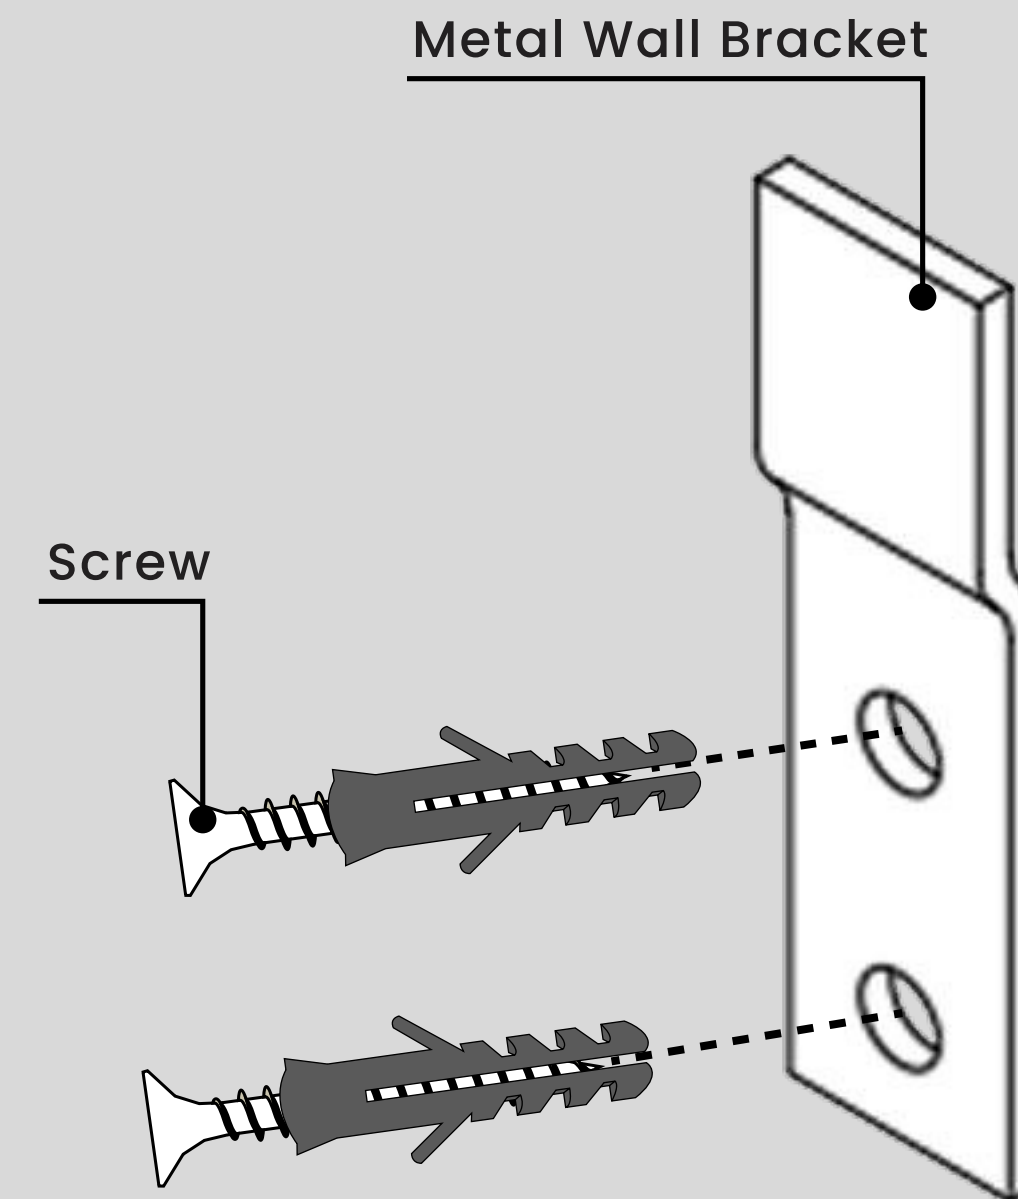

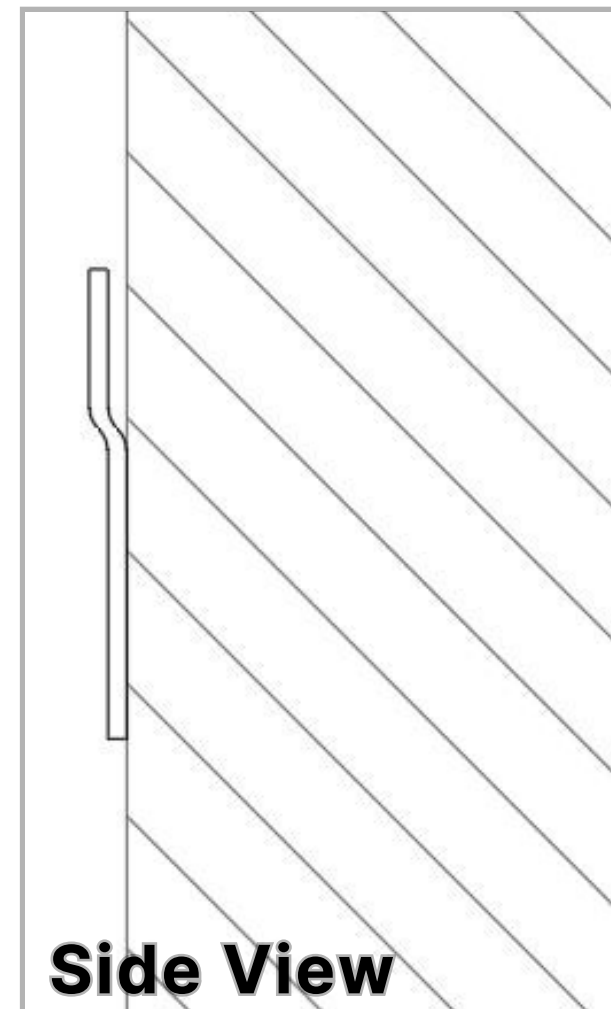

SYSTEM INSTALLATION: OPTION A

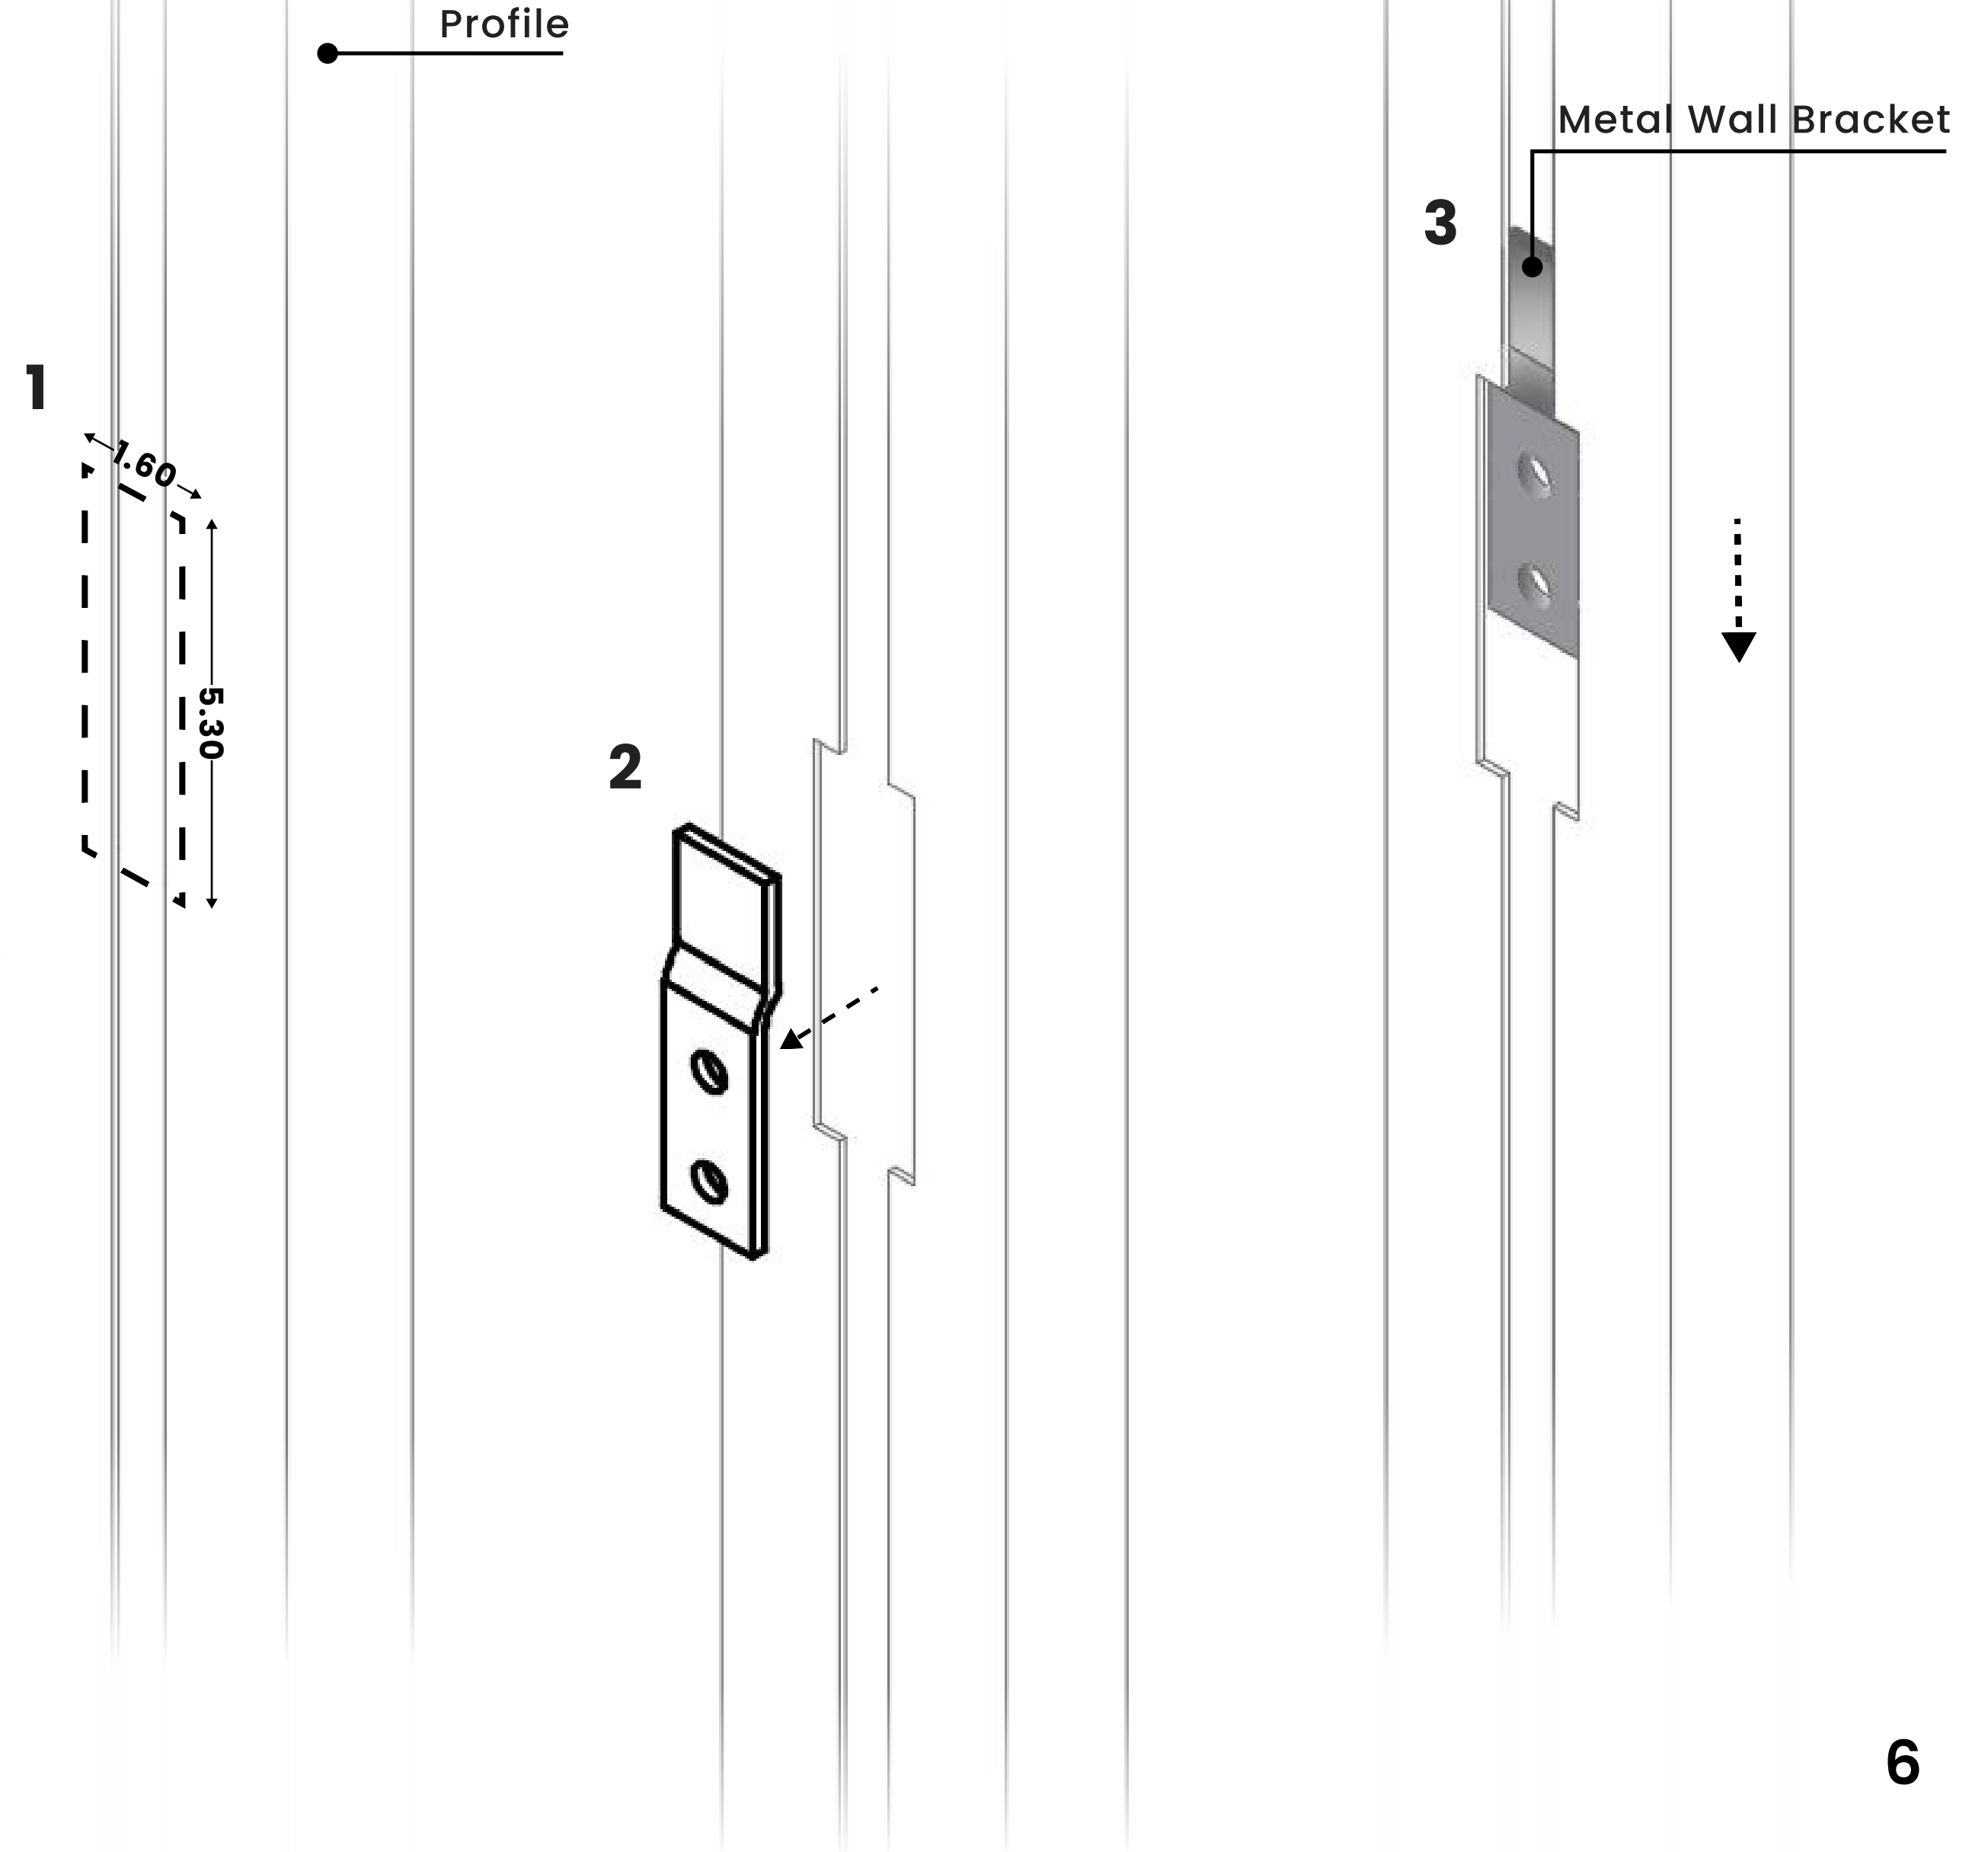

Back Surface Cutting With metal wall bracket.

- **Step 1:** Fix the metal wall bracket to the wall with screws.

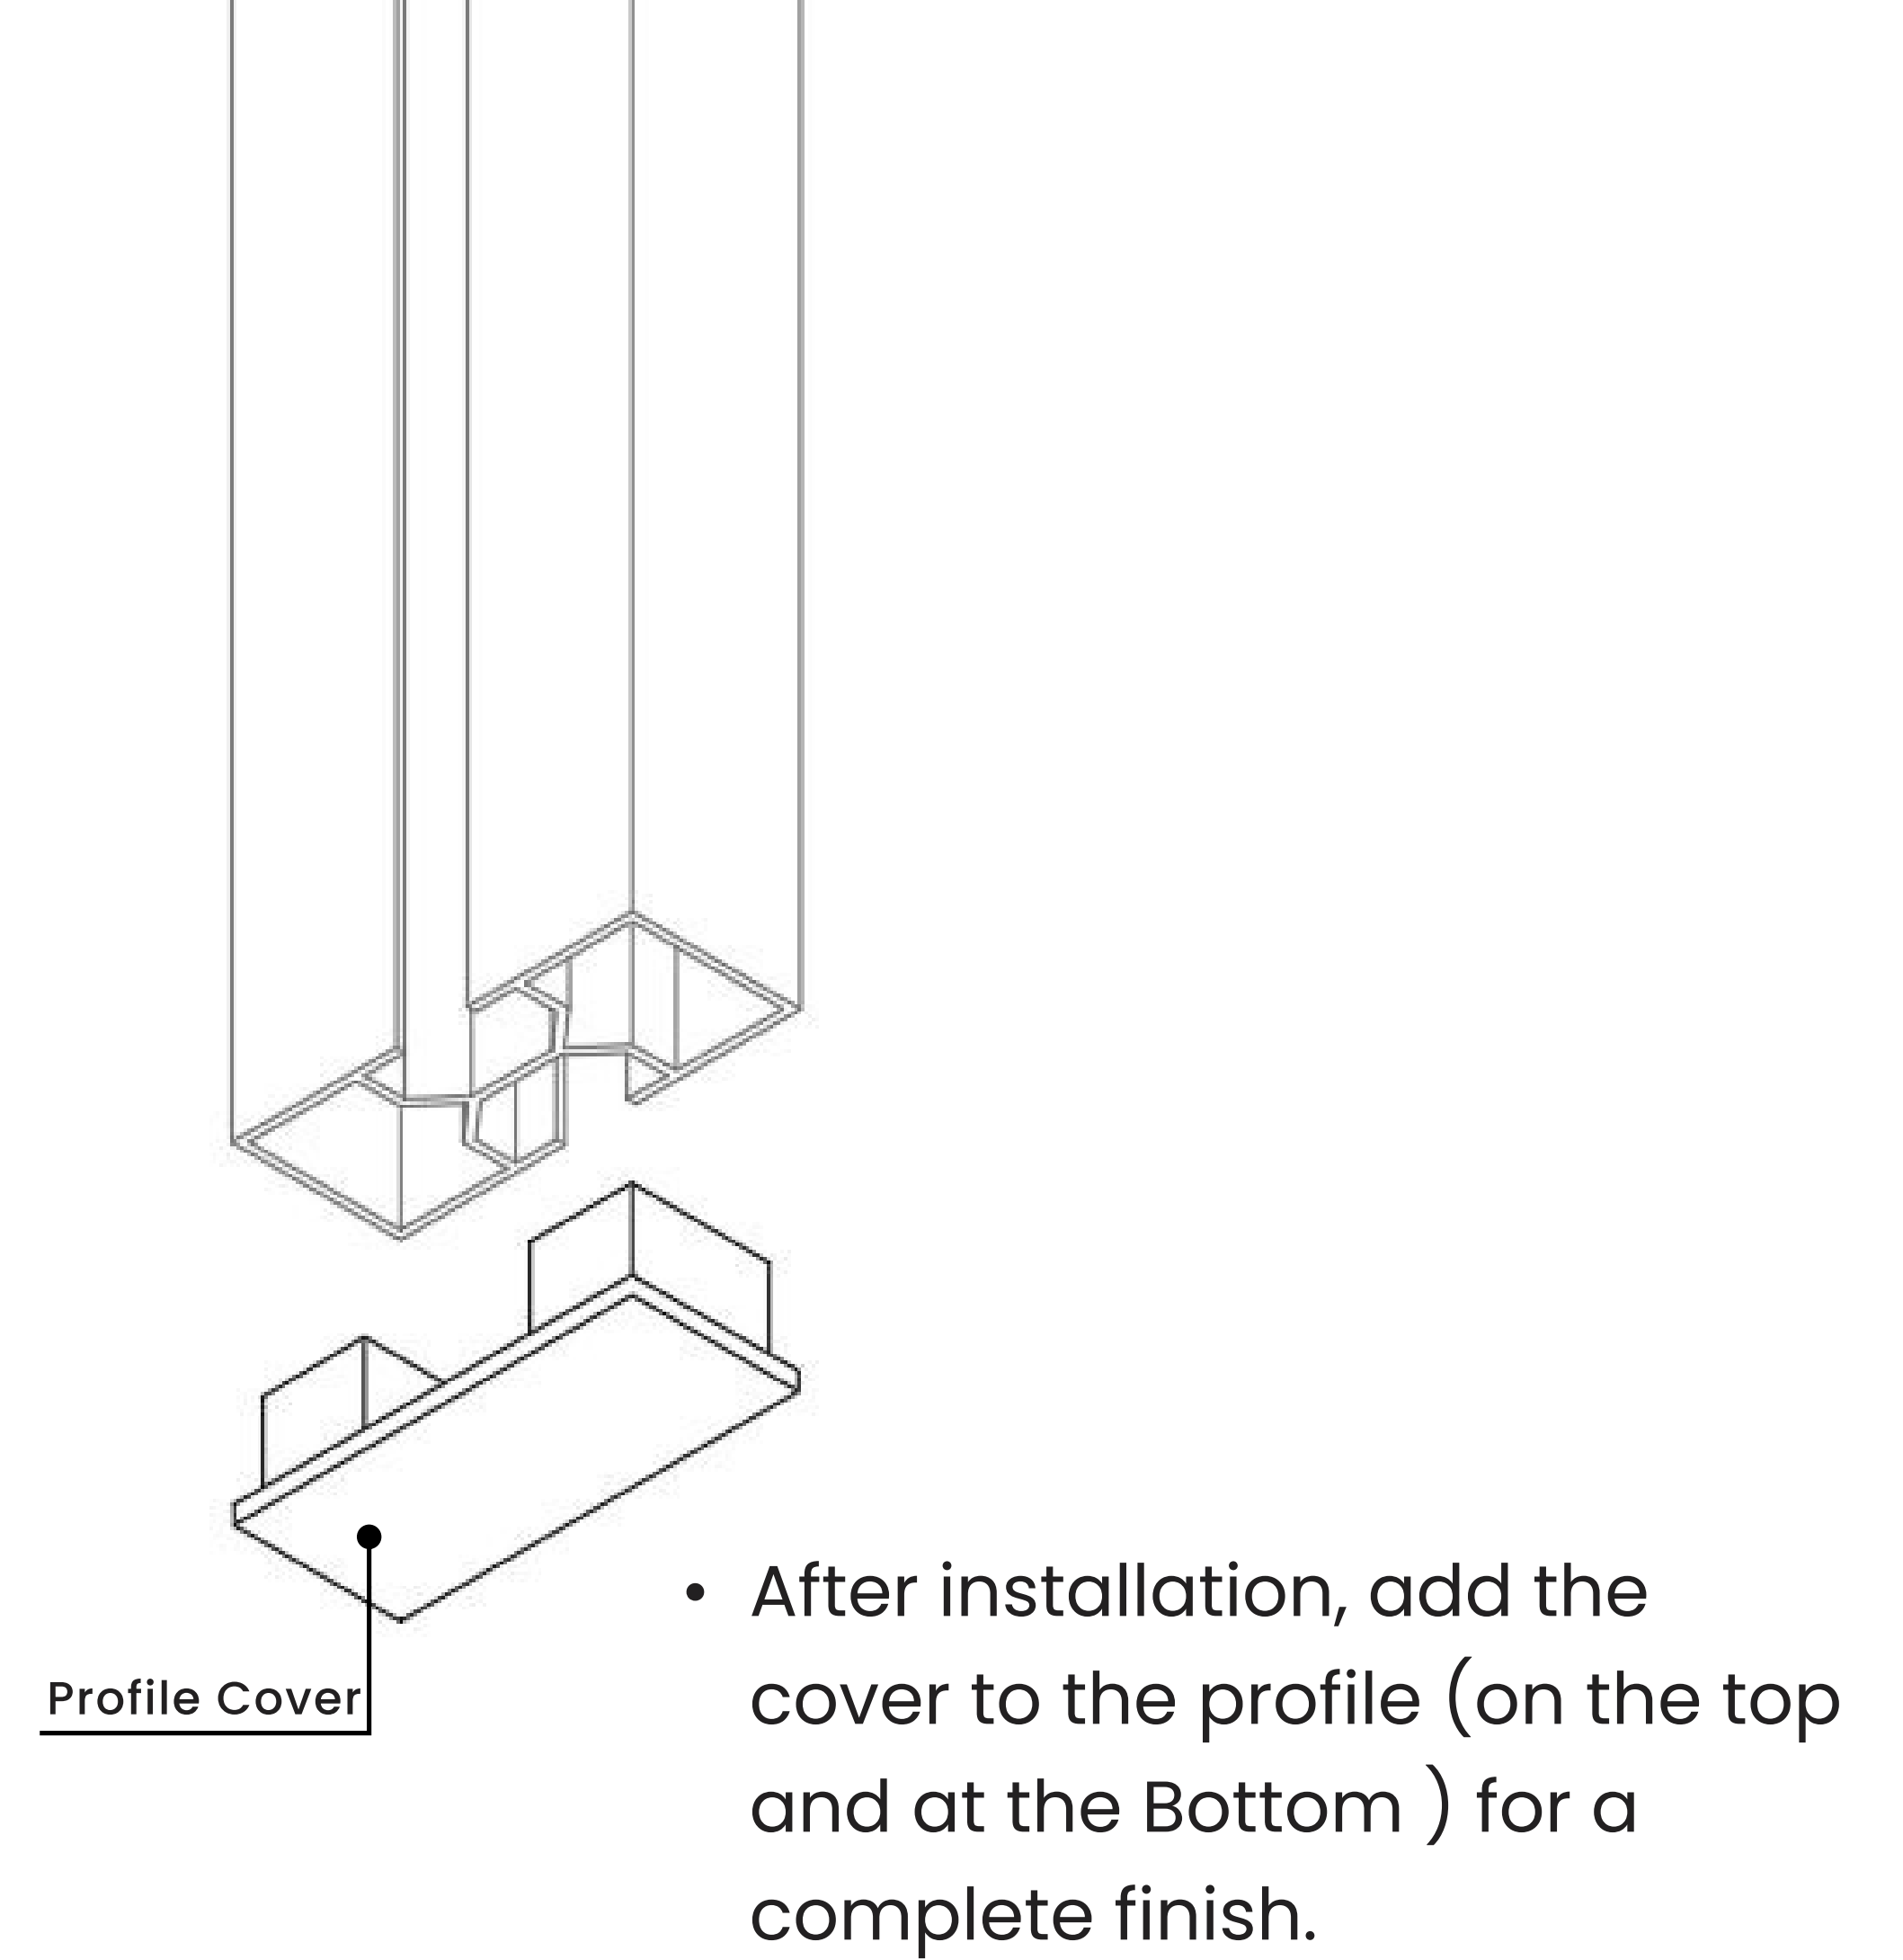

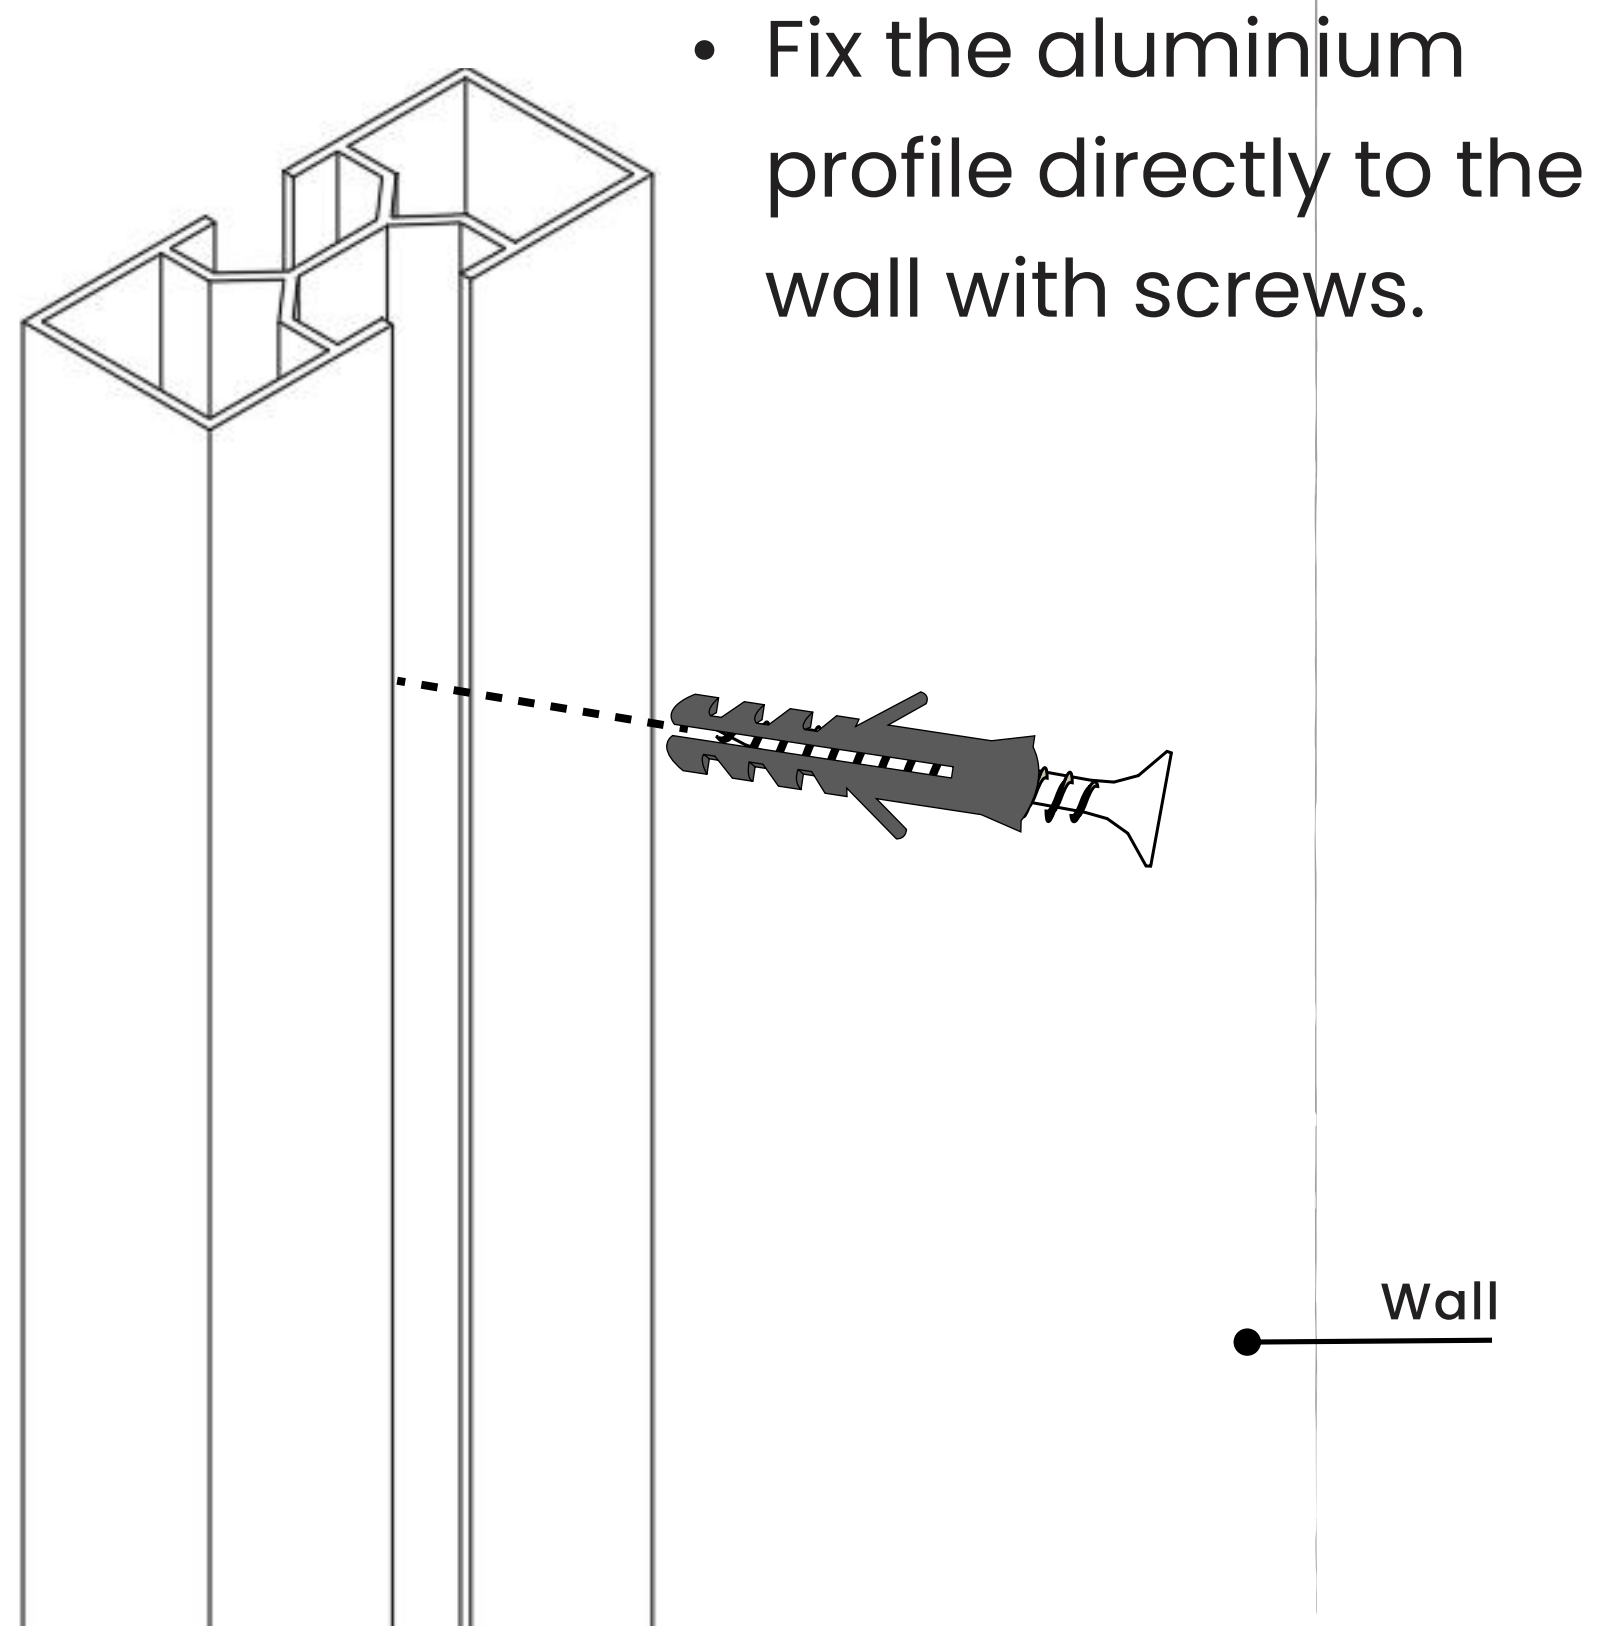

SYSTEM INSTALLATION: OPTION A

- **Step 2:** Prepare the profile by making a groove on the back side (the surface facing the wall). This groove (**1.60 x 5.30**) allows the bracket to fit properly and ensures stable installation.

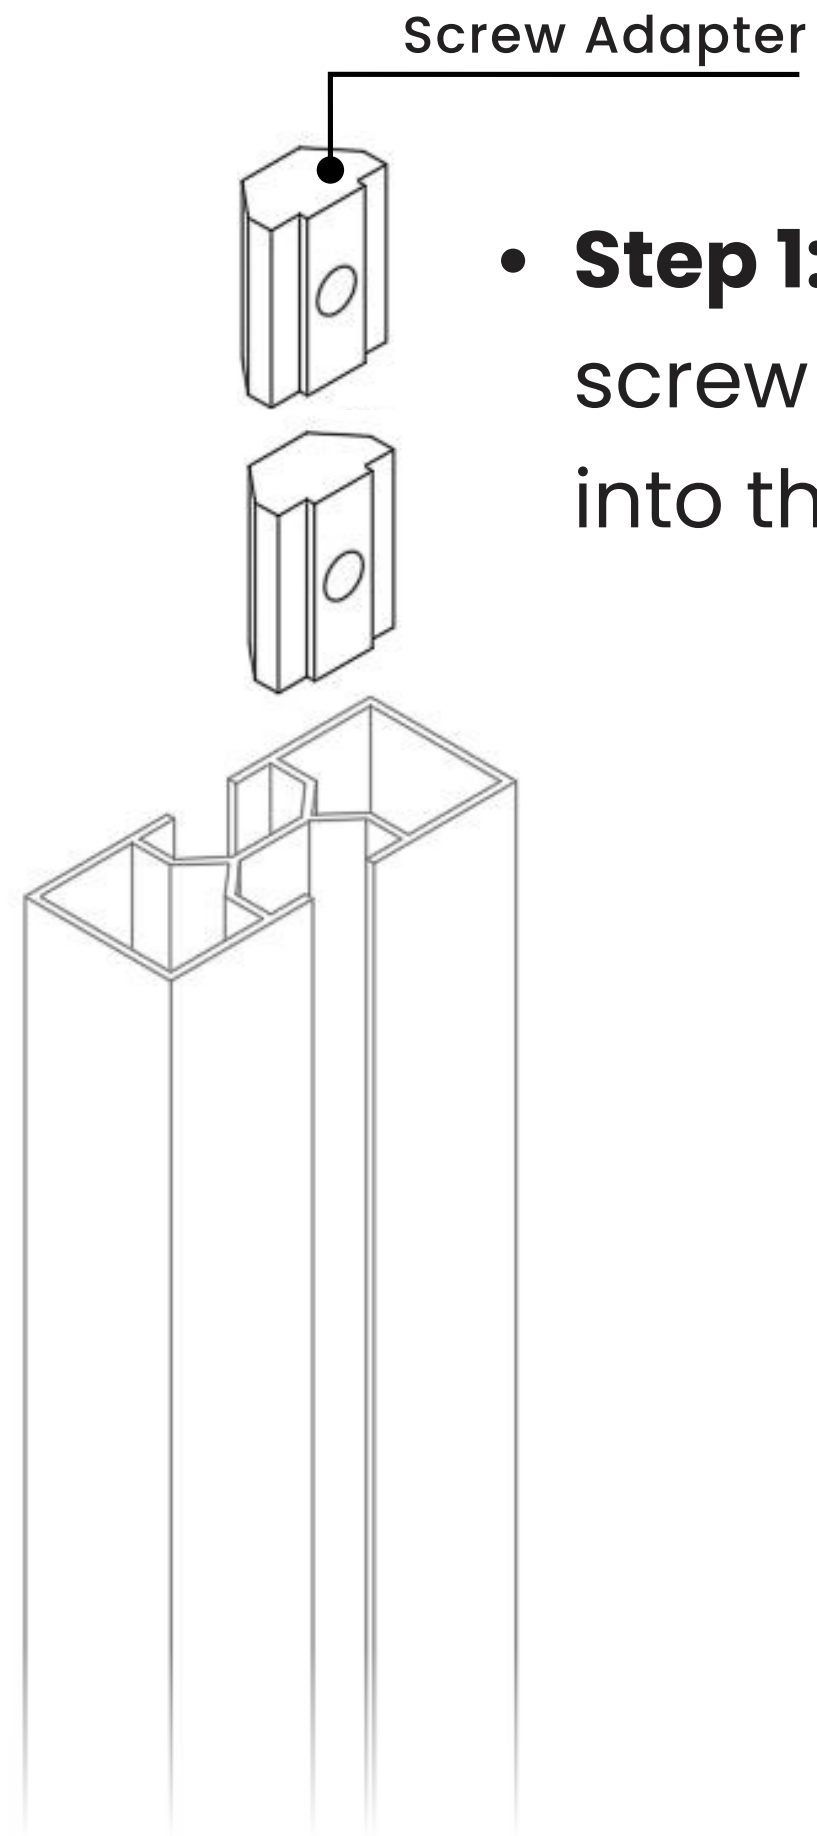

SYSTEM INSTALLATION: OPTION B

Without a metal wall bracket and directly to the wall.

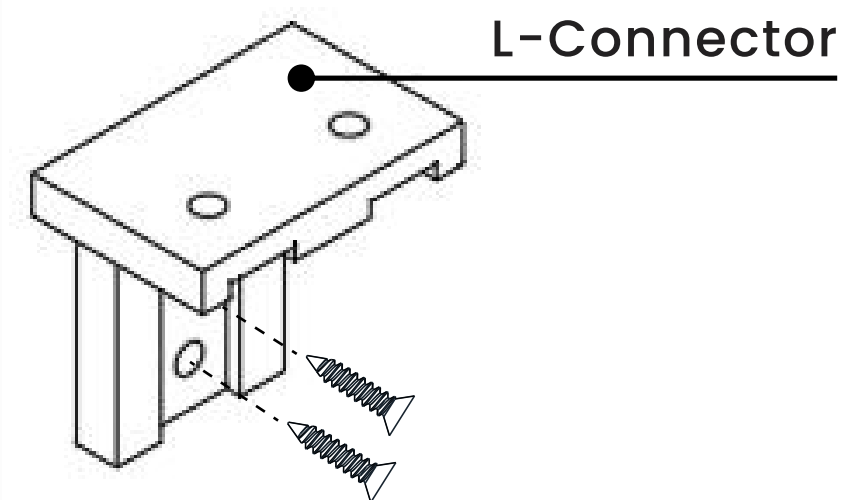

CONNECTOR INSTALLATION: OPTION A-B

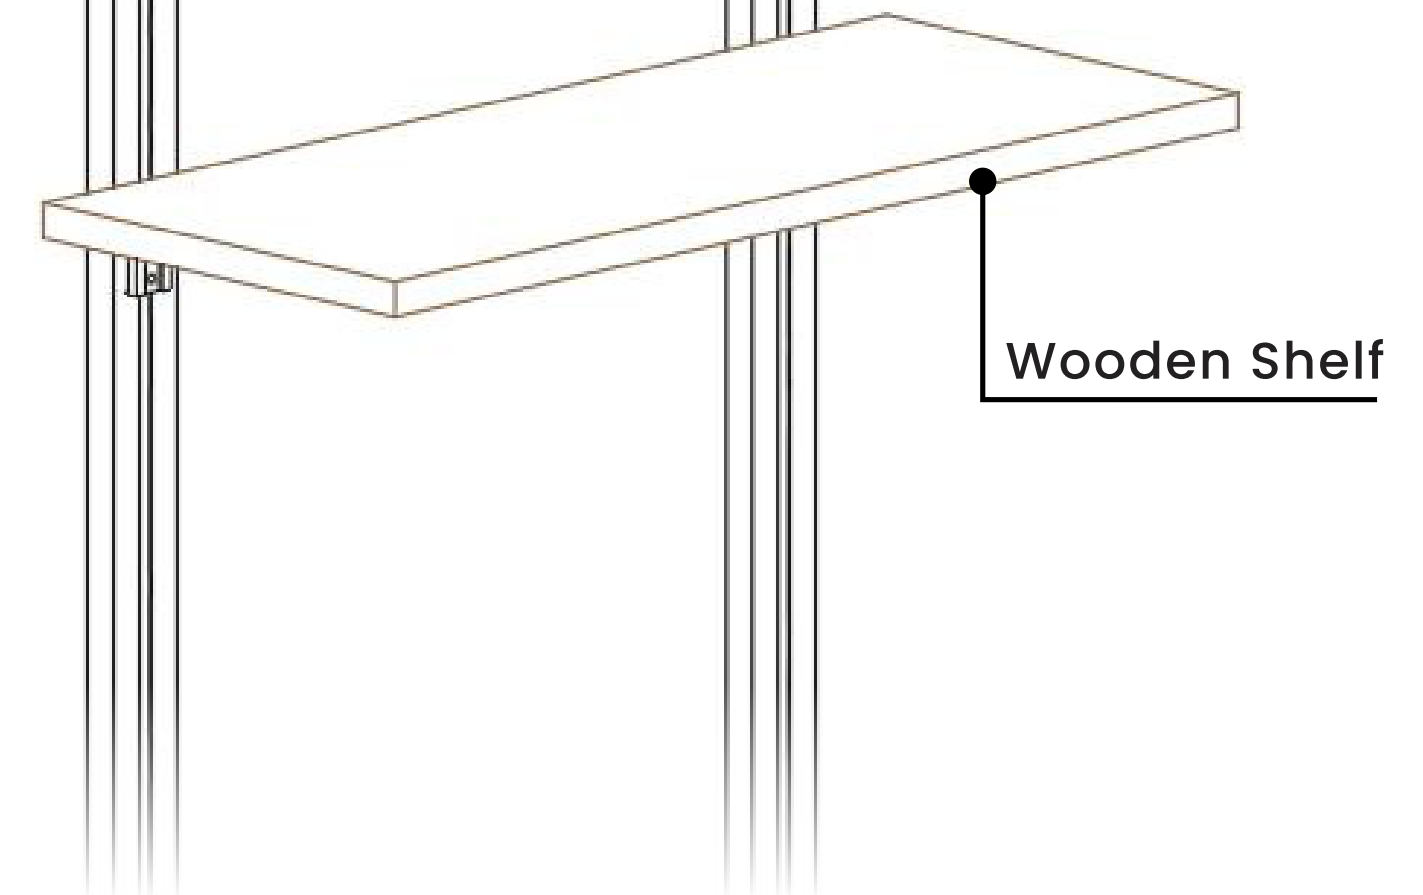

- **Step 1:** Insert two screw adapters into the profile.

- **Step 2:** Fix the L-connector to the screw adapters with screws.

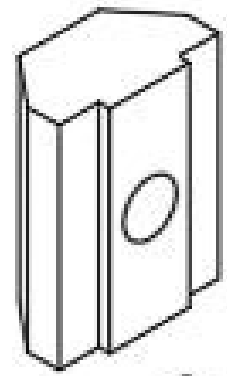

- **Step 3:** Place the wooden shelf onto the connector and secure it.

SHELF BRACKET INSTALLATION

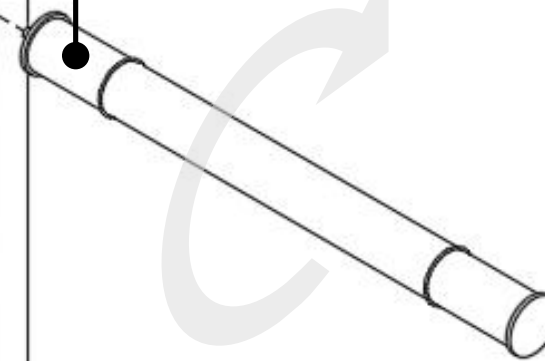

- **Step 1:** Insert the screw adapter into the profile.

- **Step 2:** Fix the aluminium shelf bracket to the adapter:

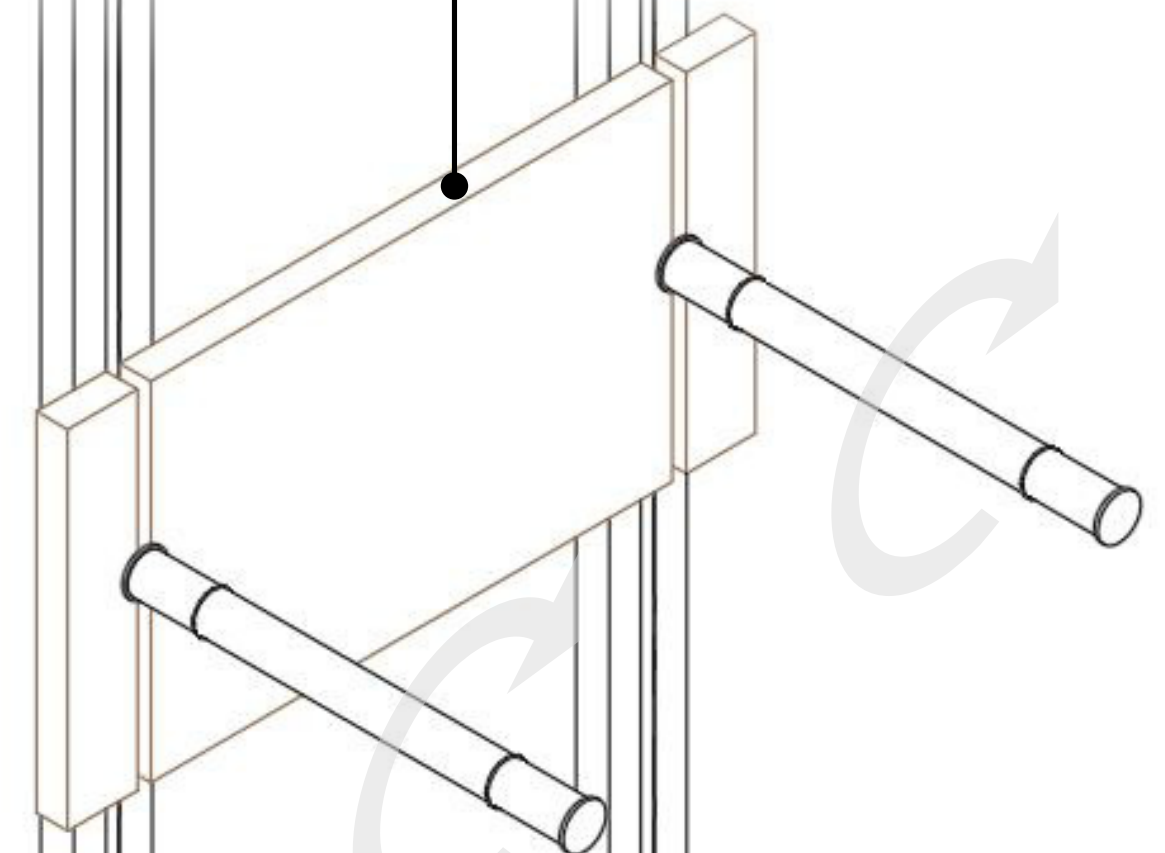

Option 1: Fix the aluminium shelf bracket to the adapter using a short screw.

Aluminum Shelf Bracket

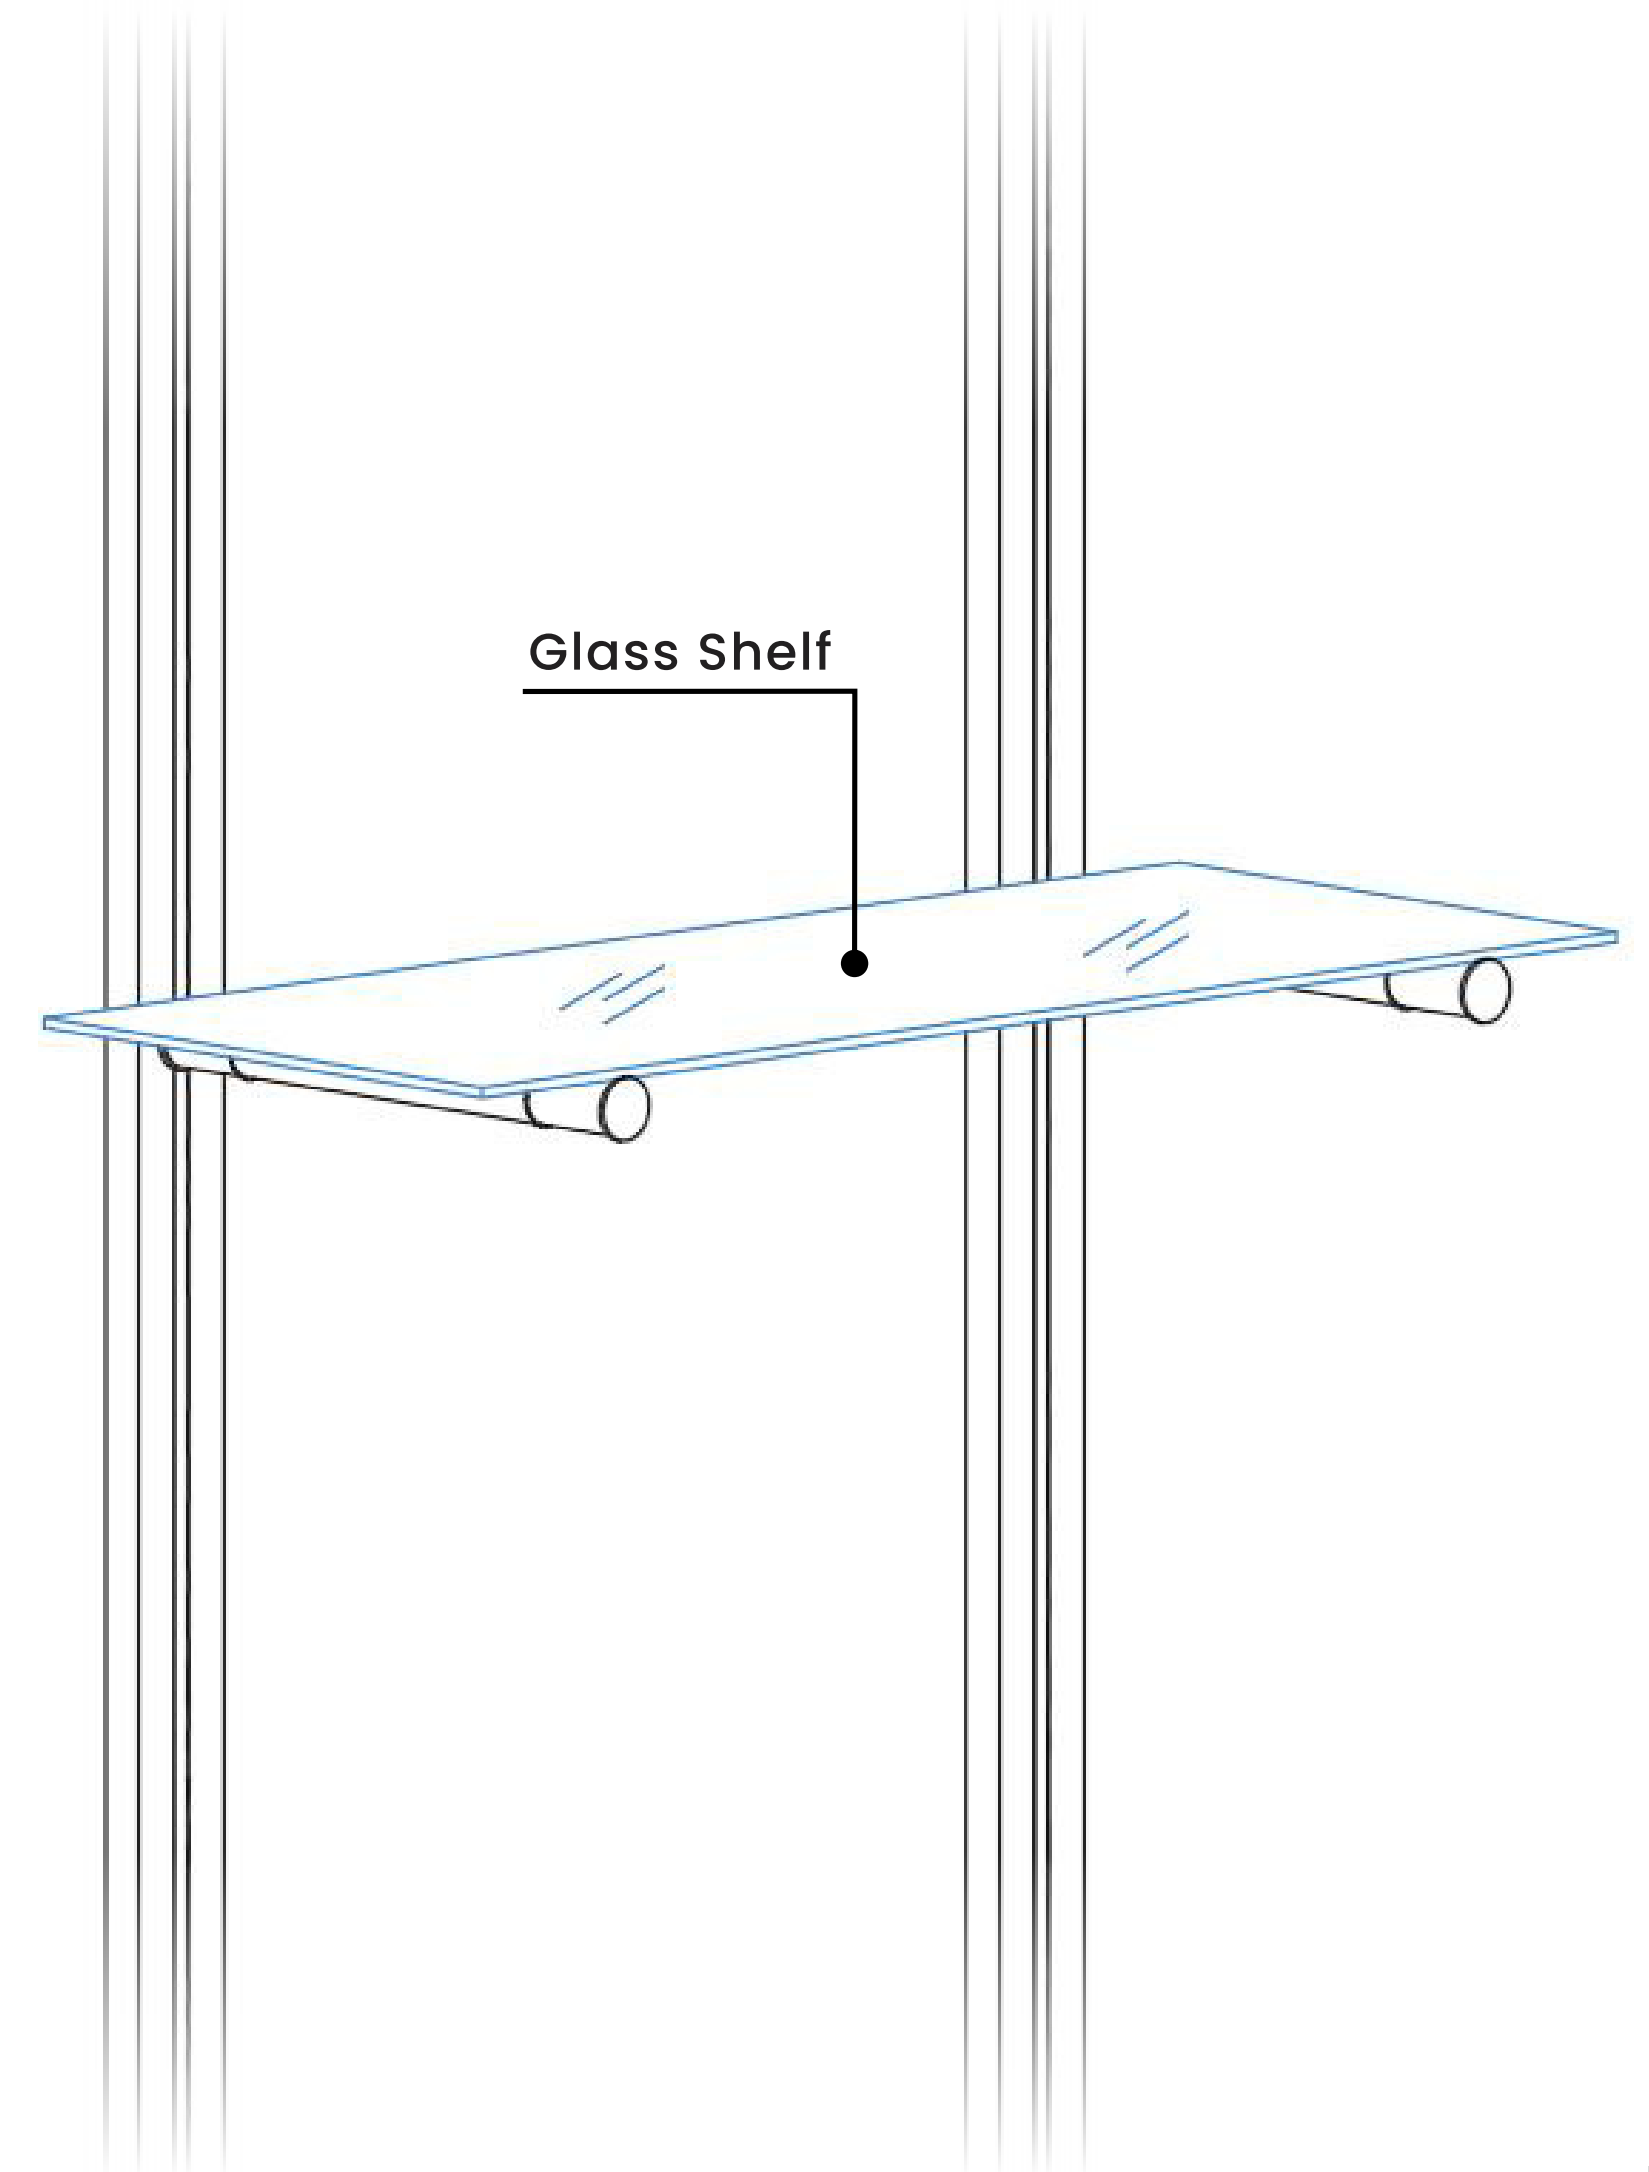

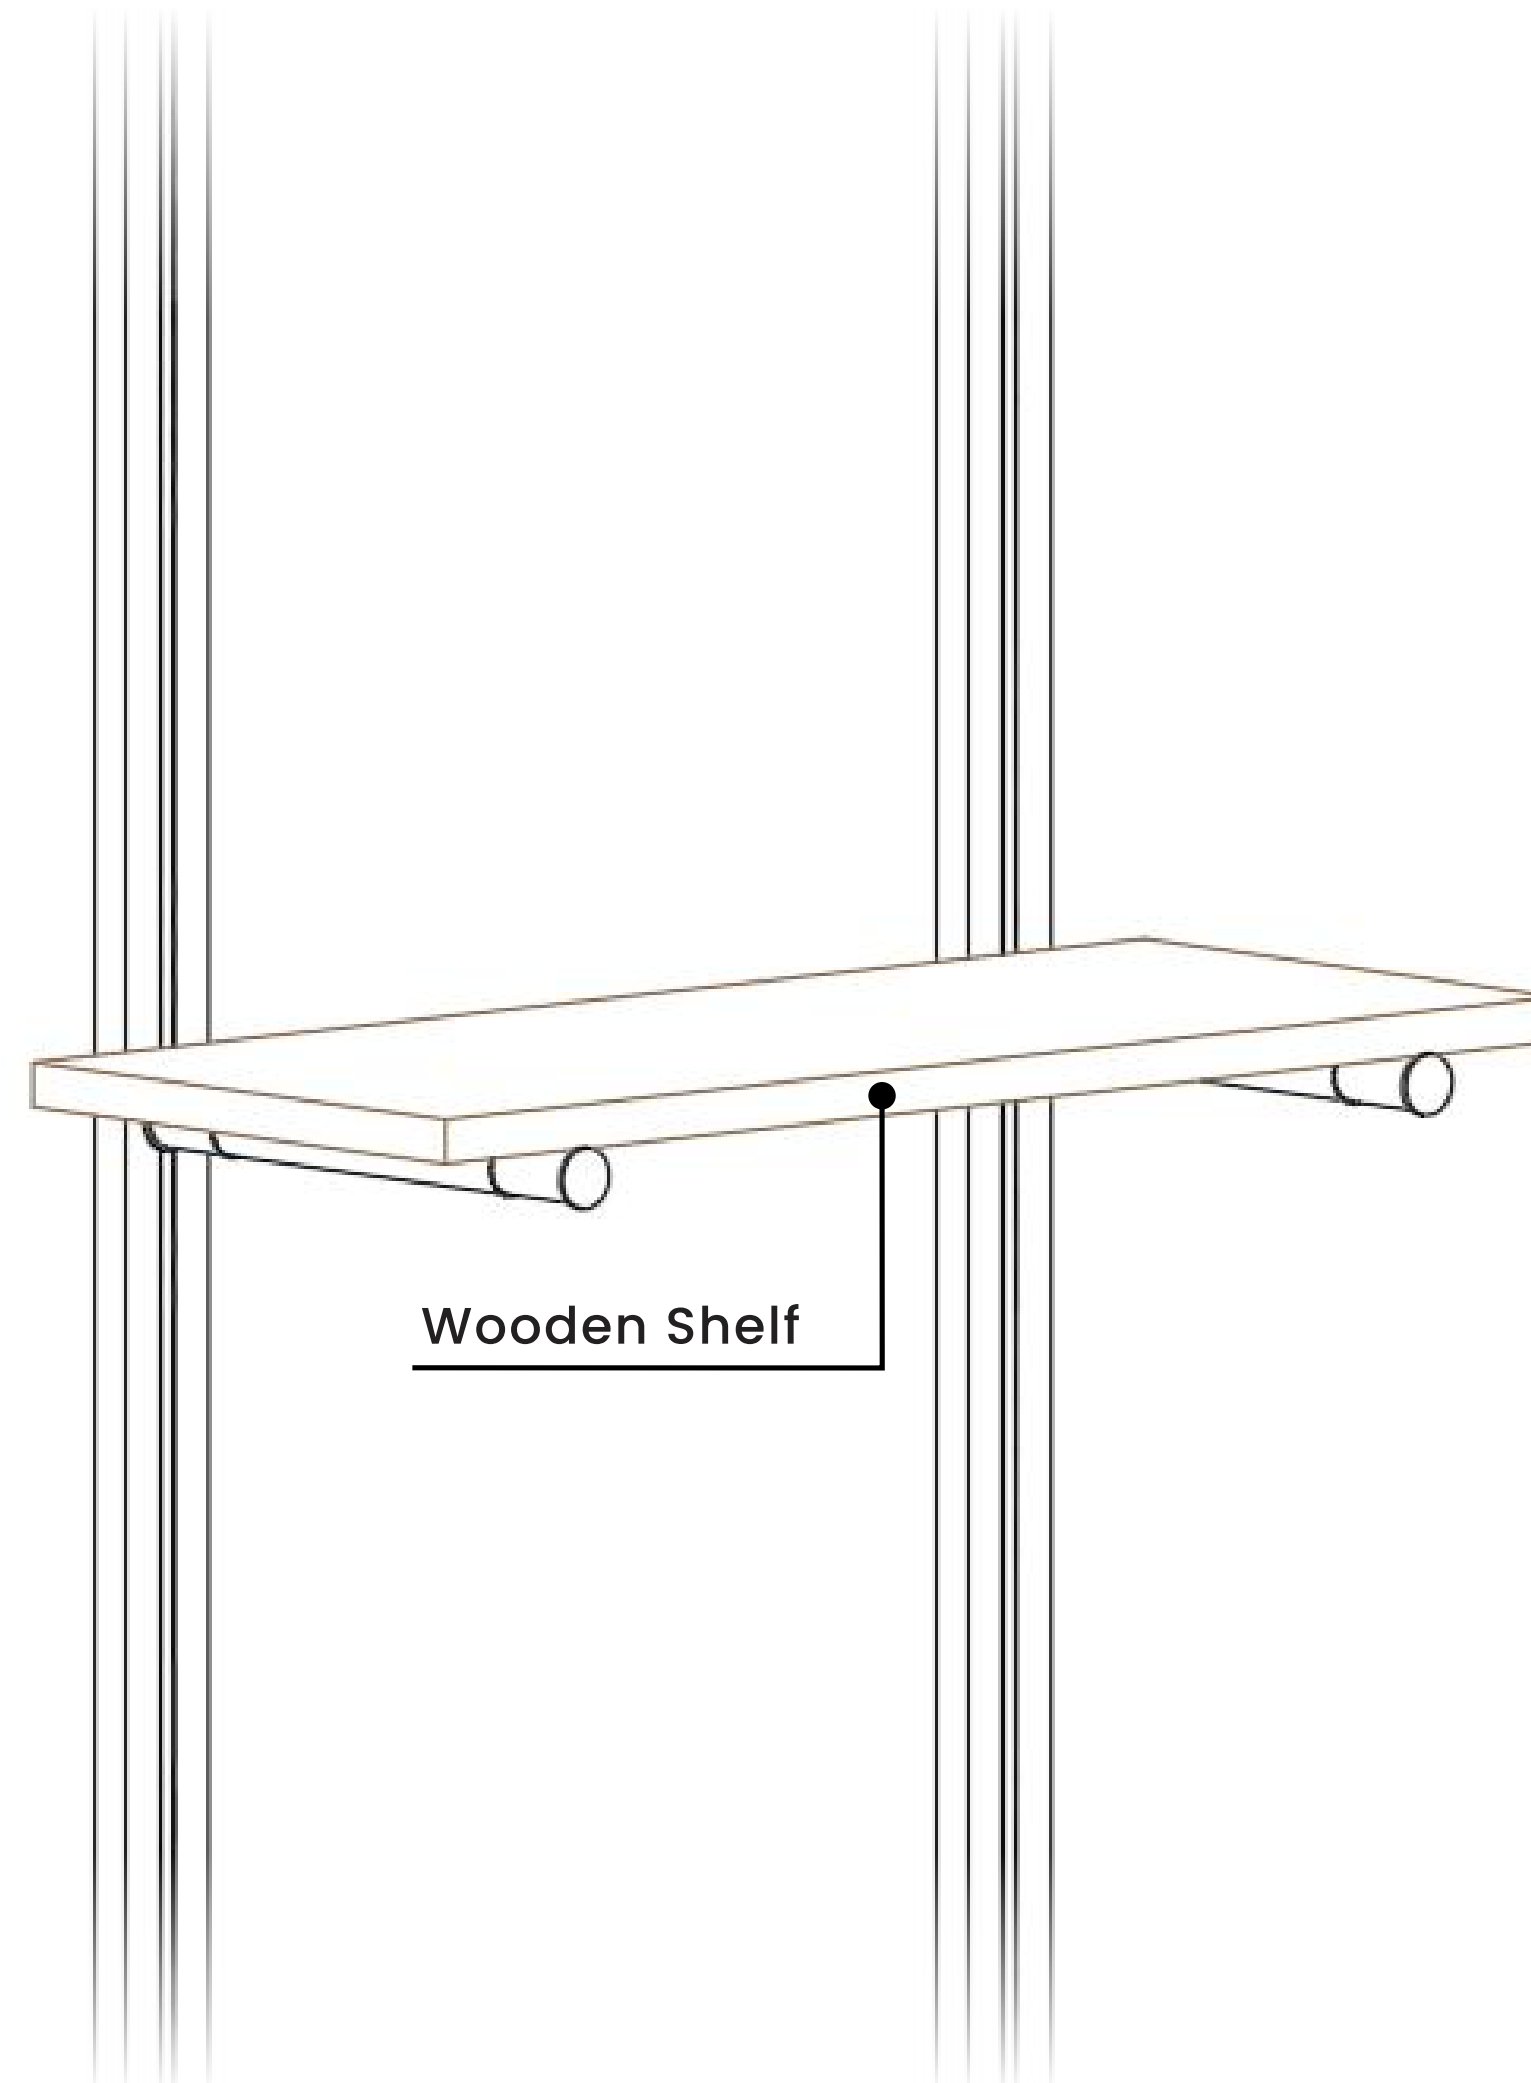

Option 2: If there is wooden cladding, use a long screw for secure fixing.

Wooden Cladding

SHELF BRACKET INSTALLATION

- **Step 3:** Place the glass shelf or wooden shelf on the bracket.

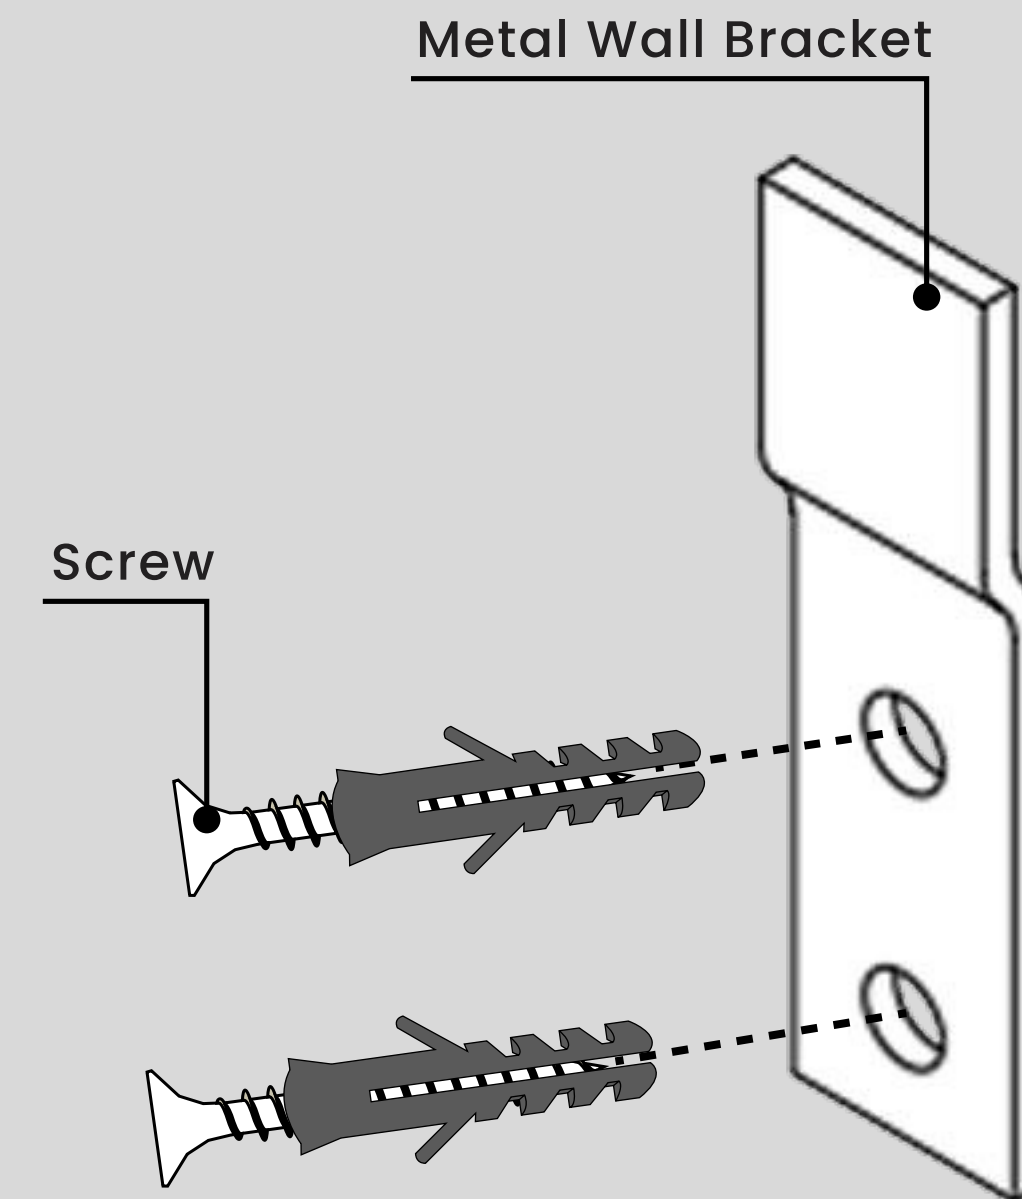

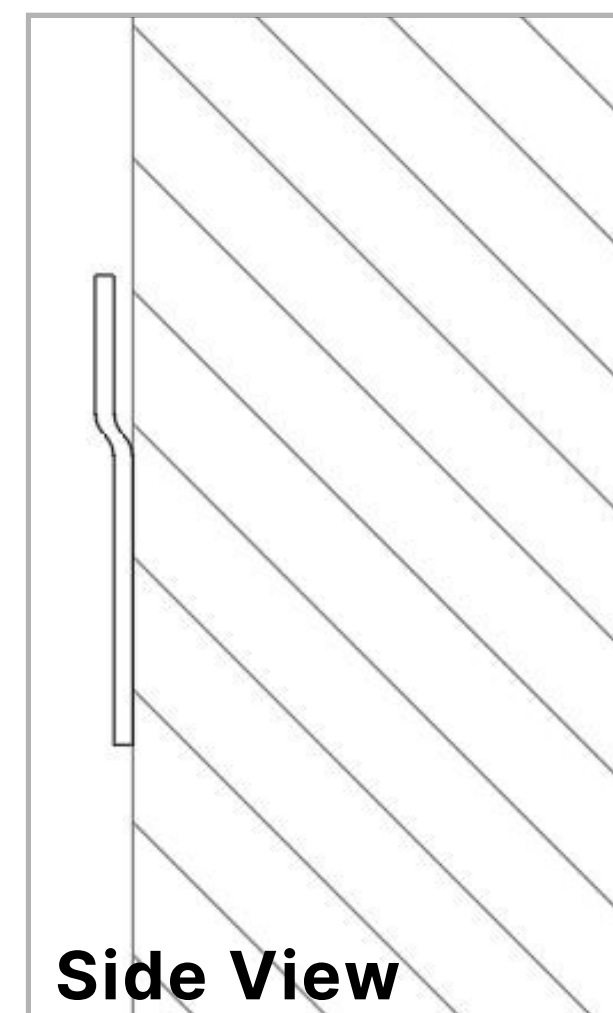

SYSTEM INSTALLATION: OPTION C

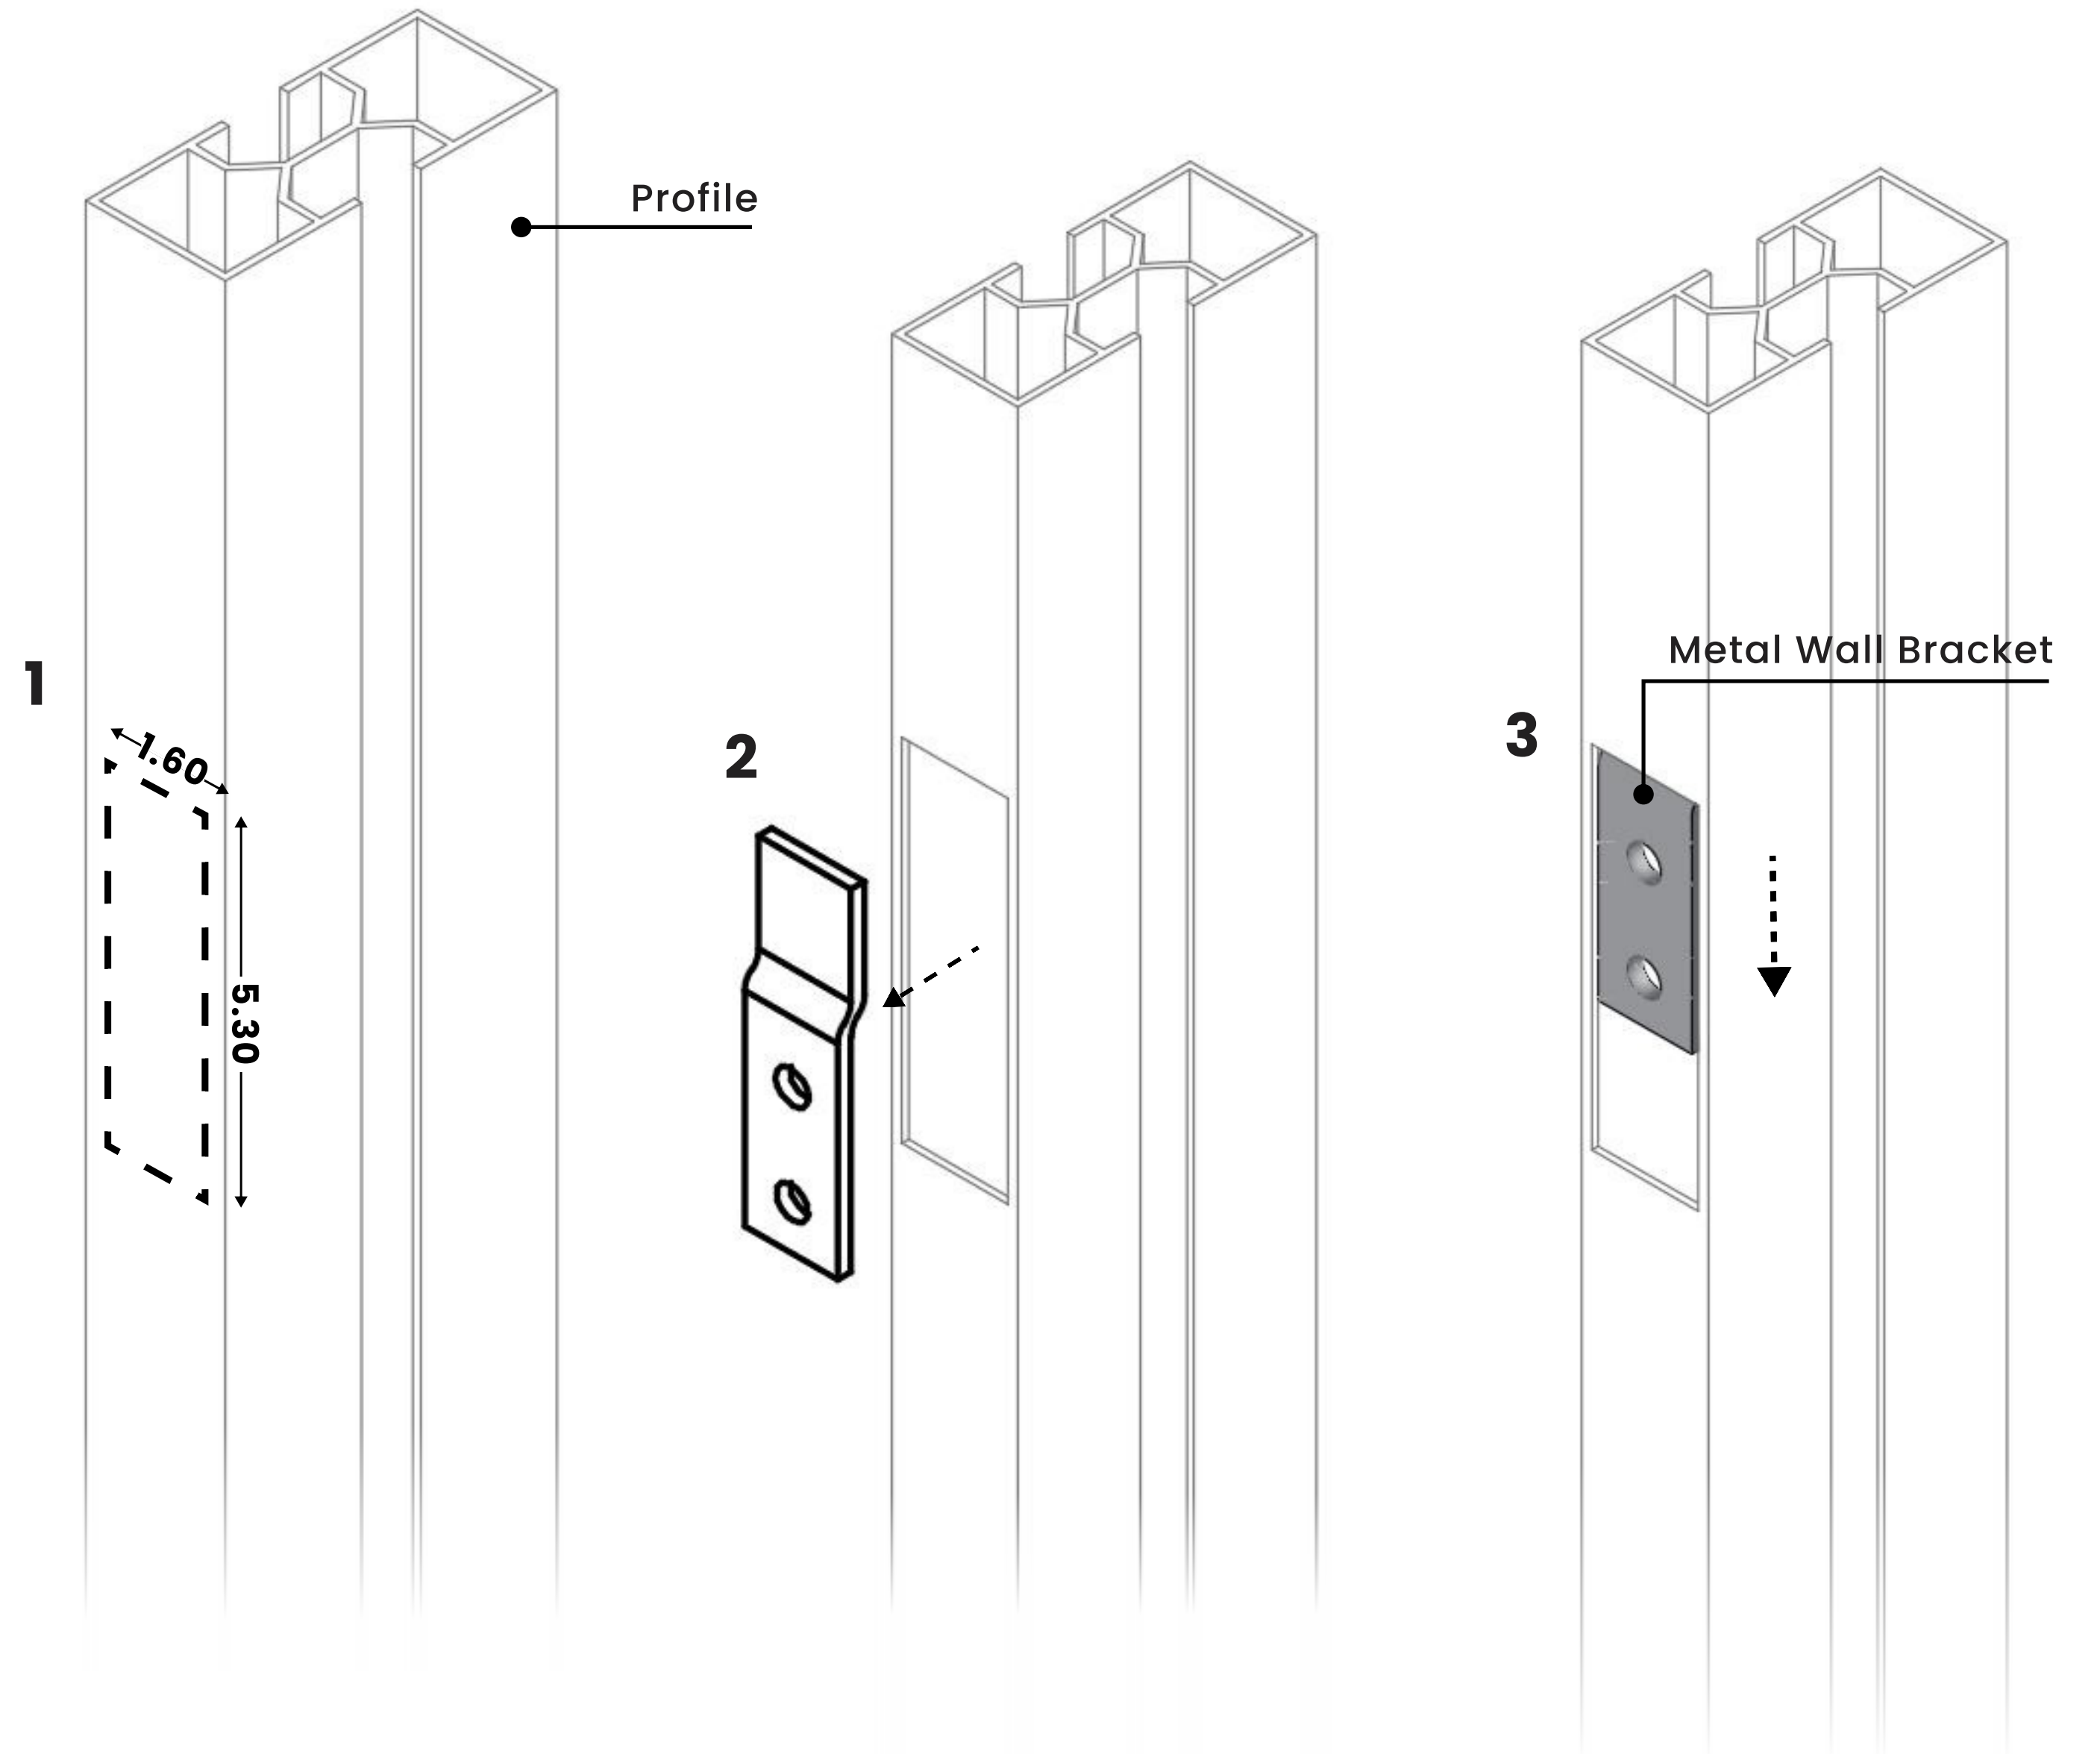

Side Cutting With metal wall bracket.

- **Step 1:** Fix the metal wall bracket to the wall with screws.

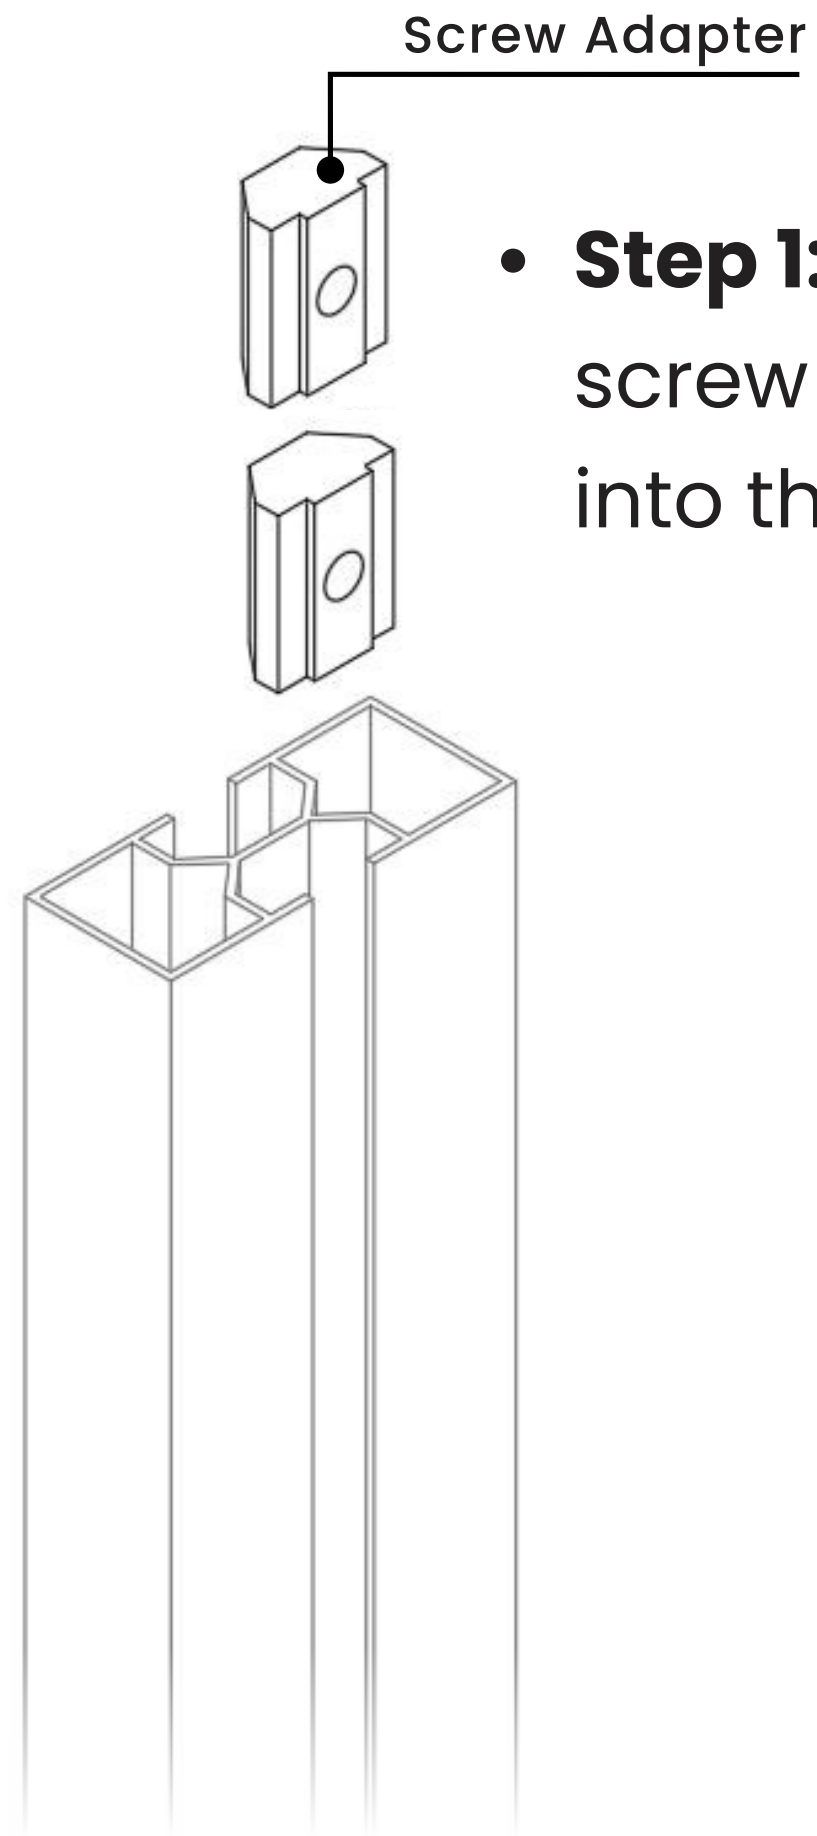

SYSTEM INSTALLATION: OPTION C

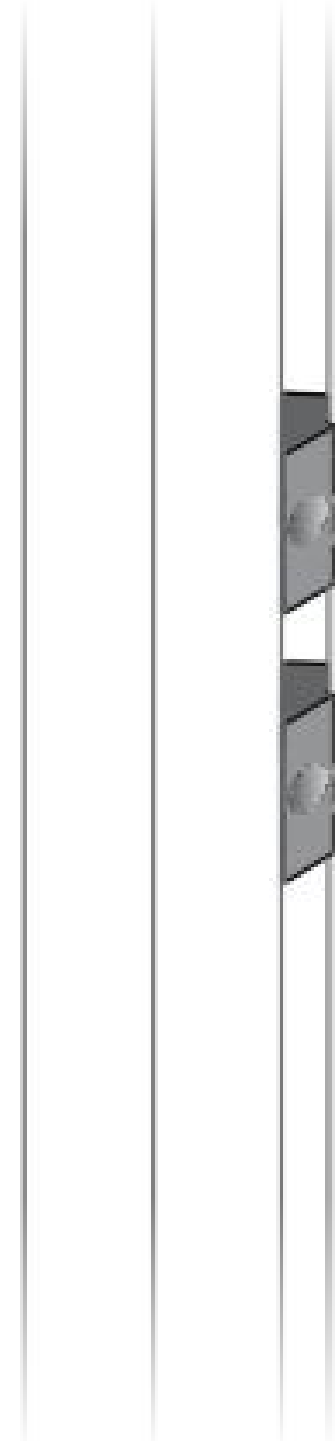

- **Step 2:** Prepare the profile by making a groove on the side surface. This groove (**1.60 x 5.30**) allows the bracket to fit properly and ensures stable installation.

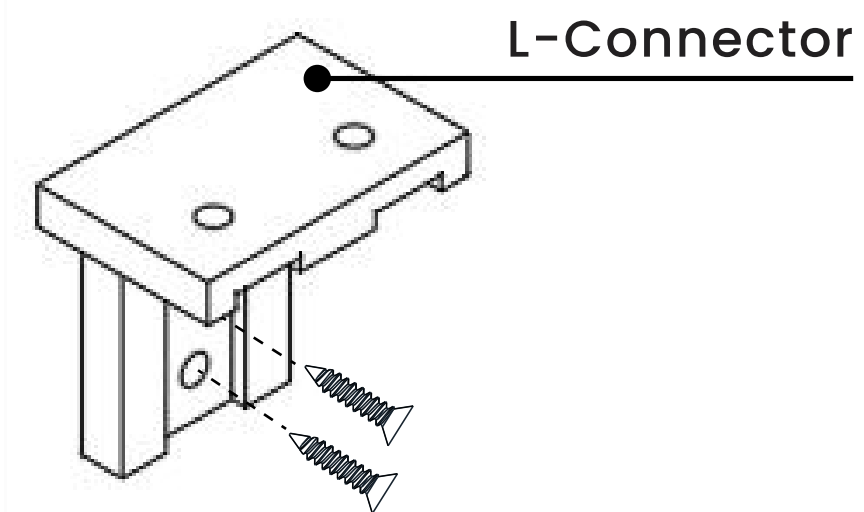

CONNECTOR INSTALLATION: OPTION C

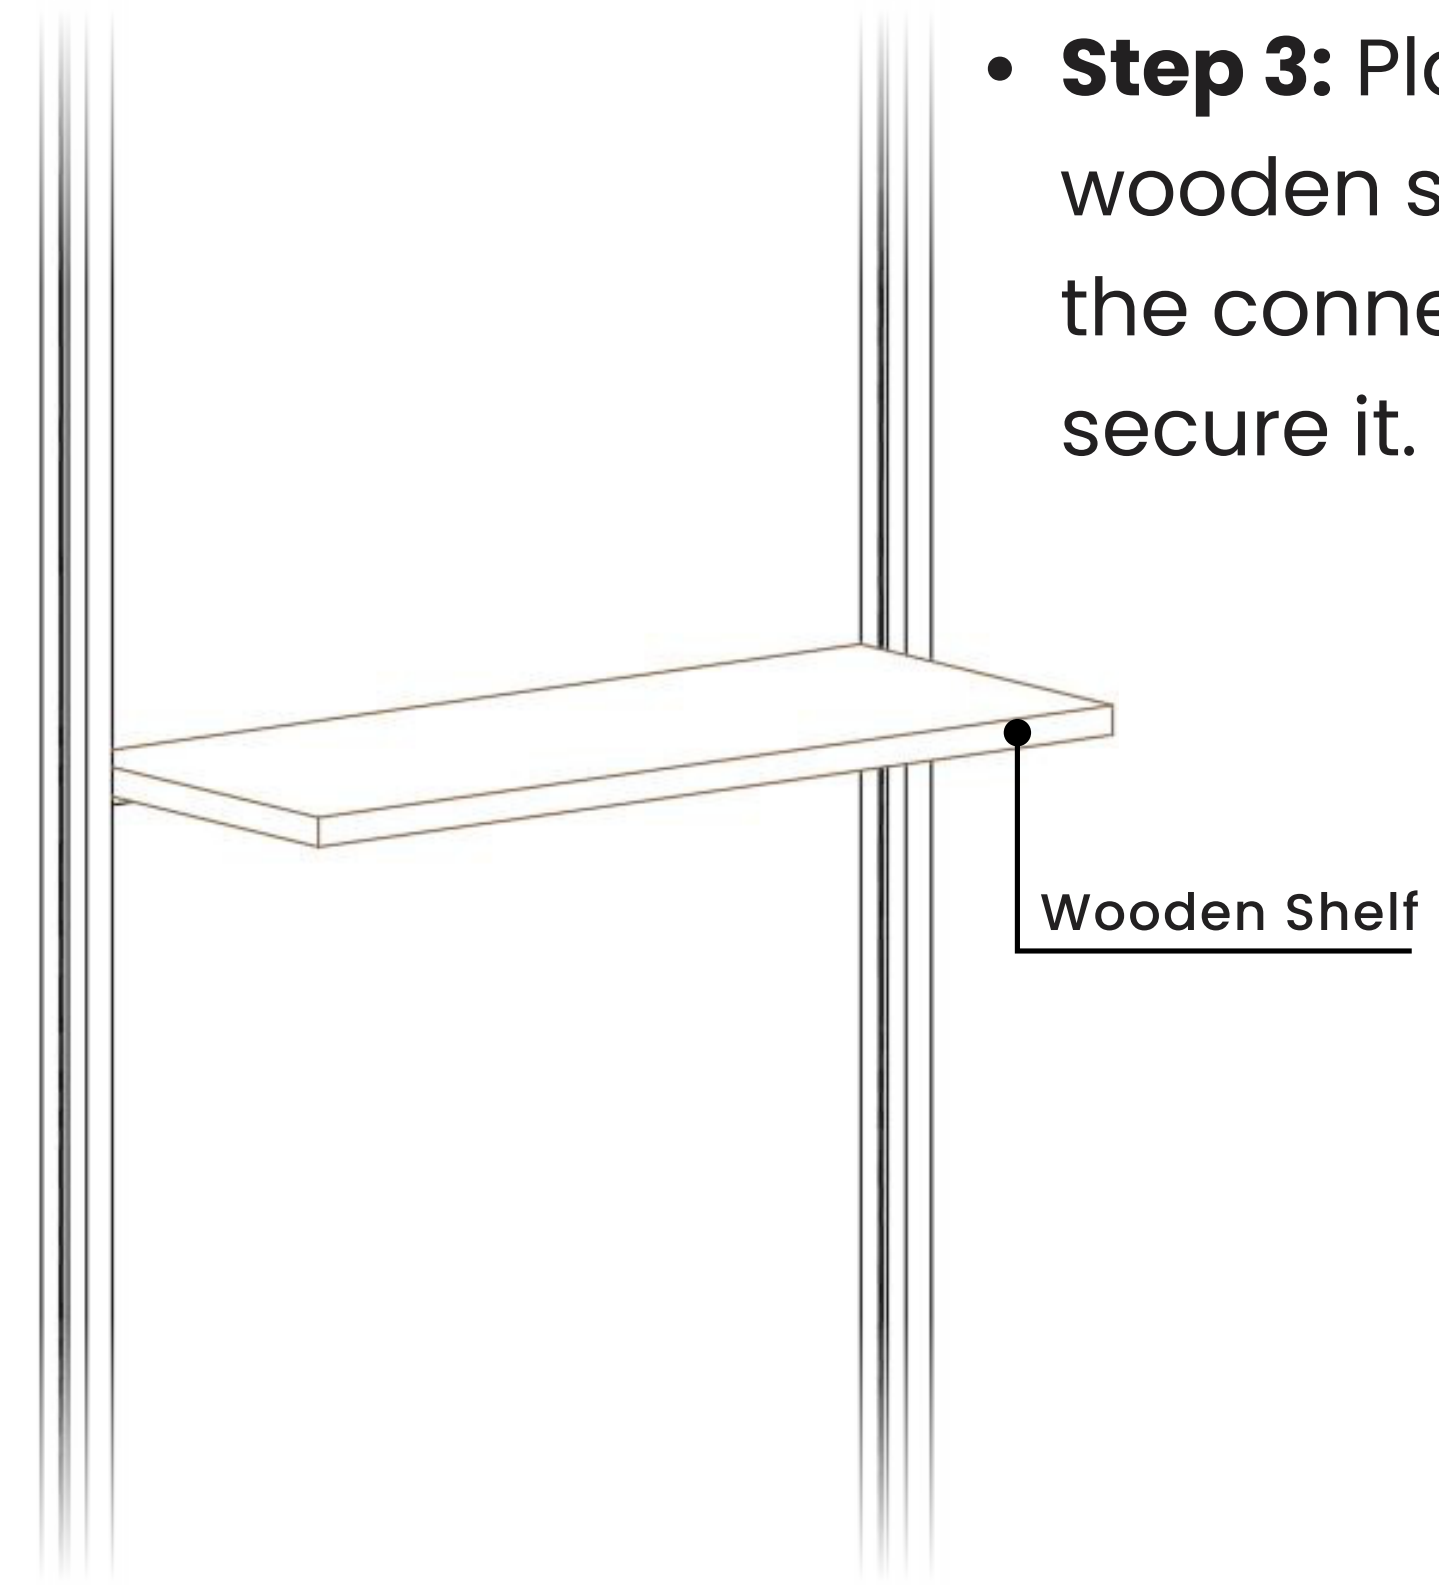

- **Step 1:** Insert two screw adapters into the profile.

- **Step 2:** Fix the L-connector to the screw adapters with screws.

- **Step 3:** Place the wooden shelf onto the connector and secure it.
